5 mei 2015   this might answer your question basically it is html encoding for a few predefined characters characters like gt and amp are html

entities specifically they are named html

22 mei 2013 most of the text editors even notepad comes with a find and replace option paste your code in there and use the find and replace option to change all the into lt and into gt

watch gt 5 pro和gt 5 46mm 42mm

strictly speaking to prevent html injection you need only encode as lt if user input is going to be put in an attribute also encode as if you re doing things right and using properly quoted
